CAREER OBJECTIVE

I am seeking challenging opportunities where I can fully use my skills for the success of the organization

PROJECTS

BadBank
The BadBank project is a hypothetical endeavor where a separate entity, called a "bad bank," is created to take over distressed assets from troubled financial institutions. By doing so, the original banks can focus on their core operations while the bad bank manages and resolves the troubled assets. The objective is to restore stability to the banking system by removing toxic assets and reducing risk.

Fine Management System
The project aims to streamline the fine management process by integrating with existing databases, offering automated notifications, secure online payment options, and real-time tracking of fine statuses. By enhancing transparency, reducing administrative burden, and improving compliance rates, the project aims to contribute to a fair and efficient regulatory environment.

DECLARATION
